Ashgabat, Turkmenistan

PROFESSIONAL SUMMARY

Python developer with hands-on experience in backend development with Django and in working with artificial intelligence. I build clean, maintainable server-side applications and integrate AI models into real products. Strong foundation in object-oriented programming, data structures and algorithms, backed by university studies in Artificial Intelligence and Expert Systems. Looking for a Python / Django backend or AI-focused role where I can contribute to real-world projects and keep growing alongside experienced engineers.

KEY EXPERIENCE

- **Backend development with Django:** designing models and database schemas with the ORM, building views and APIs, handling authentication and working with the admin panel.
- **Artificial intelligence:** working with data and AI models in Python using NumPy and Pandas, and connecting AI functionality to backend services.
- **Software engineering fundamentals:** clean code, object-oriented design, algorithms and data structures, testing and debugging.

SKILLS

Languages: Python, SQL

Backend: Django, Django REST Framework, Flask, REST API design

AI & Data: NumPy, Pandas, machine learning basics, expert systems

Databases: Relational databases, Django ORM, database management

Engineering: OOP, data structures, algorithms, testing and debugging, Git

EDUCATION

Oguz han Engineering and Technology University of Turkmenistan

2022 – Present

Undergraduate, Ashgabat, Turkmenistan

Faculty: Computer Science and Information Technology

Major: Artificial Intelligence and Expert Systems
